

Research Paper Writing Service

Practice for undergraduates is an obligatory stage of the educational process in any direction - economics, jurisprudence, pedagogy, etc. Every graduate must complete this course at the end of the semester. The volume and schedule of the progress of scientific research is consistent with the scientific adviser. The place for his temporary work the graduate also coordinates with the teaching department.

Goals and objectives of R & D

The purpose of practice can be called systematization of the theoretical base accumulated during the period of training, as well as the formation of skills in conducting scientific research by setting and solving problems on the topic of the dissertation.

The main task of the research work (R & D) of the student is to gain experience in the study of the problem posed, the selection of analytical materials for writing the final work.

[Best Research Paper Writing Services](#)

During the R & D period the student studies:

- information sources on the theme of his thesis research;
- methods of modeling, data collection;
- modern software products;
- rules for the preparation of scientific and technical reports.

Based on the results of research, the master student must finally formulate the theme of his dissertation, prove the relevance and practical value of this topic, develop a program for its study and independently implement a scientific study.

Place and features of the passage of research practice

Research practice can be carried out on the basis of organization of any field of activity and form of ownership, the establishment of a system of higher education, in the state or municipal government.

The research practice for the undergraduate consists of the stages:

- Preliminary stage (preparation of work plan)
- The main research stage
- Compilation of a report

- The attestation of the undergraduate student based on the results of his work is carried out on the basis of the protection of the submitted report.

For the organization of scientific research it is necessary:

Choose the place of future practice, having coordinated it with the head;

Conclude an agreement between the chosen practice base and university;

Directing students to practice, the curator of masters organizes a meeting at the department of the university and provides students with a program of practice, a diary, a direction, an individual task and other necessary documents.

Head of Research at the University:

1. helps write an individual plan for the student;
2. studies and evaluates the analytical materials collected during the work and the diary;
3. conducts the overall management of the research process.

For the entire period of practice, the organization provides the master student with a workplace. For the current management of the research work (R & D) of the student, the head of the practice from the organization is responsible.
